

HARDIK MEHTA

hardikmehta2511@gmail.com | +91-7289845051 | India | Portfolio : hardik-mehta-2511.github.io | [LinkedIn](#)

PROFESSIONAL SUMMARY

- My background combines formal business education (PGDM-International Business) with a foundation in computer applications, giving me a perspective that connects technical analysis with business decision-making.
- I build practical projects across data analytics, business intelligence, automation, machine learning and AI – using tools such as Python, SQL, Tableau, Excel, Power BI , and modern AI technologies.
- My approach is simple: start with the business question, understand the data, build the analysis, and communicate the result clearly enough to support a decision.

PROJECTS

Book Intelligence RAG | [VIEW PROJECT](#) | [LIVE DEMO](#)

(Python · RAG · LLMs · Web Scraping · Streamlit)

- Built a RAG-based application that allows users to query a structured book dataset using natural-language questions, making information retrieval more accessible to non-technical users.
- Developed an end-to-end workflow covering web scraping, data preparation, retrieval, and LLM-based response generation.
- Integrated the workflow into an interactive Streamlit application,

Customer Segmentation & Machine Learning | [VIEW PROJECT](#) |

(Python · Pandas · NumPy · scikit-learn · K-Means · Matplotlib · Seaborn)

- Performed exploratory and multivariate analysis for customer segmentation.
- Applied K-Means clustering to identify and interpret distinct customer groups.
- Translated the resulting segments into business recommendations for retention, re-engagement, upselling, and personalized marketing campaigns.

SaaS A/B Testing Analysis| [VIEW PROJECT](#) |

(Python · MySQL · SQL · Tableau · Statistical Analysis)

- Designed and analysed a Control vs Experiment workflow to evaluate an AI feature across conversion, engagement, and user behaviour.
- Built an initial 10K-user experiment and scaled it to 100K users when the smaller sample did not provide a sufficiently clear conclusion.
- Used SQL and Python for analysis and Tableau to communicate experiment results and business implications.

EDUCATION

FORE School of Management, New Delhi	PGDM, International Business Marketing	2023-2025
ESSEC Business School, Paris, France	International Immersion Programme	September 2024
Vivekananda Institute of Professional Studies, New Delhi	BCA, Computer Applications	2018-2021

PROFESSIONAL EXPERIENCE

Bluwheelz	Business Development Associate	May 2024 – August 2024
- Conducted B2B market outreach across distributors and corporate clients to identify EV mobility requirements and potential business opportunities. - Managed the Uber supplier account, tracking weekly feedback from 10+ key clients including Zomato and creating profiles for 100+ vehicles on the Uber supplier platform to improve fleet visibility and operations. - Supported market expansion initiatives through the launch of new Bluwheelz hubs, including the Kirti Nagar furniture market, contributing to on-ground business development and operations.		

TECHNICAL SKILLS

Python:	Pandas, NumPy, Matplotlib, Seaborn, OOP, Exception Handling, Comprehensions, Generators, Decorators
SQL:	MySQL, Querying, Filtering, Aggregations, GROUP BY, HAVING, JOINS, Subqueries, CTEs, Window Functions, CASE, Views, Indexes
Business Intelligence:	Power BI, Tableau, DAX
Excel & Automation:	Excel, PivotTables, Pivot Charts, Power Query, VBA
Machine Learning:	scikit-learn, EDA, Regression, Decision Trees, Random Forest, K-Means, Sampling, Evaluation, Imputation, Scaling, Encoding, Pipelines
AI & Data Applications:	RAG, LLMs, Embeddings, Vector Databases, Streamlit
Tools:	Git, GitHub, VS Code, Jupyter, Anaconda, Microsoft PowerPoint, Microsoft Excel

CERTIFICATIONS

Six Sigma Principles	Coursera Kennesaw State University
Corporate Finance Essentials	Coursera IESE Business School
Financial Markets	Coursera Yale University

Interests

GMAT Focus by GMAC (August 2025- March 2026): Preparing for the GMAT as part of my pursuit of PhD opportunities in data analytics/Marketing , strengthening quantitative reasoning, analytical thinking, and structured problem-solving skills. Chess: Studying openings and endgames while exploring how strategic thinking, decision-making, and anticipating consequences in chess correlate with real-life situations. Rock-Climbing / Bouldering: Problem-solving through movement, tackling increasingly challenging routes while building physical strength, focus, and persistence. Sudoku : Solving challenging puzzles that strengthen logical reasoning, pattern recognition, and systematic problem-solving.
